

We come today to share knowledge and wisdom for the sake of children and family units

Turning our backs on toxic stress is unacceptable.

LANGUAGE CAN HEAL

REDUCING/ERASING FALSE LINES

We know we can reduce ACE's

How do we do it for everyone?

Latasemā = of one mind "holding us in one mind in a diversity of systems."

now tell us what to do!

we are the generation that must change to break the path from conception to prison!

RESEARCHERS THINK TANK OPENING

NOV. 3, 2010

① invest in people of Washington - support their values

② Inventory of changed practices on the ground

③ Bringing you hear, have you talk
* See what emerges from your

COLLECTIVE WISDOM

we can't afford
• Cadillacs

• not even a dozen bicycles

• but we can lay the path forward

• a future where all children & families live without ACE

RESEARCHERS THINK TANK CLOSING CIRCLE

NOV. 3, 2010

The power of long term organizing & gentle pressure

A chance to meet many new people & hear many new thoughts
Moved by depth of story & playfulness is very powerful

People are focused to not leave people behind.

Good to be in a room of old friends. Thank you all for preparing me for my new role!

Gratitude for those who traveled near & far to be here

Find a way to welcome more people into this community & keep the dialogue

Acknowledge the invitation the tubalip who brought me down here, it's that strength that is in this room!
We have the power that Republicans & Democrats all care about children!

I leave today with hope!

It is a blessing that we have persevered. It is the beginning valuable to hear & share with this level of insight honored & humbled. Energized

Deep gratitude for the work you do... as a parent

Breakthrough thinking & dialogue looking forward to seeing it grow
Using powerful stories to frame our messages
Who cares for the caretakers? Traumatic stress on our own lives

What matters to me is I make a difference in the lives of children
Dad how come you're not using SN?

In WA their feels like energy & genuineness to move forward

We feel lonely in WA - fear of success - transition to something

Nice to see fellow travelers on the road

How do we build on engagement to overcome obstacles ahead?

It is heartening to know that people are out here doing this work! So important!
Maybe the tipping point isn't as far up the hill as we think!

Continue to partner some how...

* Everyone here is the Gospel & the virals to get this story out there

* It's a very old way to stand up beside each other & speak into the fears for you!

* We need champions for this opportunity to promote health

* Breakthrough thinking & dialogue looking forward to seeing it grow

* Nationalize some of the WA projects I will do that!

* We are all in this together!

* Start @ building community capacity is here!

* We have a community of interest touched

* Bring Bus. Community & Research Com. together

* Build Communities of Practice across fields = support

* Deeper Connected Partnerships

THE ROLE OF...

RELATIONSHIPS

PARTNERING

COMMUNITY

TALKING ALL ON THE SAME LEVEL

• There is a tipping point coming, its not far away. Go forth and do radical good! •

RESEARCHERS THINK TANK

SESSION INSIGHTS &
EMERGING FOCII
NOV. 3, 2010

EMPOWER COMMUNITIES and FAMILIES

Break down barriers "us" / "them"

Policy / Case workers / Providers / Consumers

View clients as collaborators to empower themselves

Create opportunities for families
- adequate social structures to pull people out of poverty

Community Empowerment Programs need to be rigorously evaluated

Understand how community based change influences in individual outcomes

Give parents real work to do in school - community collaboration

Give chronic users of welfare systems access to education, disability & mental health, right support to succeed.

How to define Social Capital for communities, families & individuals

How to measure Social Capital

Bring Corporations into ACE's discussion, focus on improving quality of life for communities & workers

SHIFT SUPPORT TO RIGHT RESPONSE

RECOGNIZE PERCEIVED DIFFERENCES IN CULTURE ARE IMPORTANT

PERSPECTIVE SHIFT OF POLICY MAKERS

NEW COMMUNICATIONS MODELS NEEDED

CHANGE THE STRUCTURE

NEW THINKING HOW TO USE EXISTING \$

Acknowledge Indigenous "pre-engagement" as an ethical space to support communities to articulate their goals according to their models.

Do no harm is actually doing harm

Traditional practices (w/dribble) basket weaving sitting in lodge are spiritually & neurobiologically important

Neurobiology translates ACE from abstract to visual

Get politicians to think about ACE data that supports prevention as a better use of \$

Indigenous self government - get white people to understand how existing policies & practices maintain the status quo

Communicating with stories
- through all media
- have a solution

We need champions who can elevate this issue - Prevention Makes Economic Sense!

Improve communications of health information above the silos!

There is a wide range of resources

need to be brought together

Inequality is a driver - difficult to translate research into applications

Adaptive curriculum change in medical training to community medicine - build bottom up!

Communities as partners, not clients

Coalition for Community Support

Need for Conveners in education

Create occasions for people to come together

Taking existing \$ and look at how to do the work now and do it differently

Look at the Health Care Legislation and identify the key areas/opportunities that fit into alignment

We need a perspective shift - BIG - No new resources for growth, OK so what next?
